Clear Touch Interactive Panel
Getting Help

Introduction

The Clear Touch 6000 Interactive Panel is the next generation of Smartboards and Promethean Boards. The interactive display panel incorporates a Windows PC computer, apps, a variety of presentation modes, allows for multiple users at once and multiple ways of saving and exporting your work.

Overview

The panel has an onboard Windows PC computer running Chrome browser, a standard software suite, access to Clear Touch app store to download Education software. Many of the top rated programs are familiar and free (e.g. Class Dojo, Kahoot, Quizlet, Duolingo, Lego Juniors Create & Cruise, Edmodo, VLC media player for android.)

The unit has multiple type inputs for easy connections. The stand can be adjusted vertically or positioned to lay flat. The panel features multi-touch capabilities with up to 20 points of touch which means more than one person may draw/write at the same time.

Getting Started

Press the power button on the lower right corner of the Clear Touch Panel.

Using Clear Touch Apps

From the bottom edge of the screen, swipe up to view the General Setting screen. Click on the Android icon to view and use the Clear Touch panel apps. (The PC side operates independently and is only needed for logging into TU Secure to access your account/files. View the login near the end of the document).

EasiNote serves as a whiteboard. Write, draw and annotate on top of your presentation.
Finder locates saved files.
Browser opens Chrome.
Clear Touch Store locates apps to download.
Get Started goes to the Clear Touch web site.
Settings shows the panel configurations.

Clear Touch Interactive Panel

Navigation

Navigation icons are always available by tapping the arrow on the left or right side of the screen and from the lower right.
The back arrow steps back screen-by-screen

Home opens the Clear Touch apps

Shows a left side window of open apps

Go to EasiNotes
Drawing and writing tools

Full screen

Tools: SpotLight, CountDown, StopWatch, AirClass.

◁ / ◁	**Volume controls** Touch ")" to reduce volume: Touch ")))" to increase volume
PC	**PC USB** Insert USB drive to access files through Windows PC
🤖	**Android USB** Insert USB drive to access files through Android system

Clear Touch Interactive Panel

Logging into Windows PC Mode

To access the PC side, touch the bottom edge of the screen and swipe up. Select the PC icon. Wait for the system to load.

Swipe from lower left corner to select Local (Key) and log in using your TU account.

 NOTE: After you log in, you will have access to personal files in your account. Faculty will have access to their H drive when logged in by clicking on the file folder in the tray. Students can open Chrome to access Google Drive.

Save your work

-Choose where you want your work to be saved. Access your cloud storage, ex. H Drive, Google Drive, One Drive, or insert a thumb/flash drive in the USB port
NOTE: Your flash drive must be formatted for PC. Do not use a drive formatted for Mac.

Ending your session

Make sure you log out. There is no need to shut down. The panel will go into sleep mode or you can click on the power button on the front of the panel and the monitor will go into standby mode.
